

# NEURO-SYNC NSA – 7 Manual

## Scope of delivery:

- Neuro-sync control unit
- Carrying bag (around neck)
- Mini USB Charging cable with power grid adaptor

## Technical Data:

- 3.4 V Lithium ions
- Current: 30-50 micro A
- E-Field: Pulsed poly-frequency with pink noise
- Intensity: 0.06V/Meter
- Pulse frequency: 1.12 Hz (Super-Delta);
- 2.6 Hz (Delta), 7.81 Hz (Global), 8.7 Hz (Theta),
- 9.6 Hz (Slow Alpha), 10.6 Hz (Alpha),
- 16.6 Hz (Slow Beta), 34 Hz (Beta)
- Sizes: 50x90x16 mm
- Weight: 50 grams
- Storage: -10 - +50 Deg. C, max. 85% room humidity
- Usage: 0-45 Deg. C, max. 85% room humidity

**How it works:** NSA-7 is used for a subtle stimulation of brain waves and natural brain functions. These waves are a mix between electrical and magnetic signals in the frequency region of 0.5 – 120 Hz. It is known that the brain is a sender but also a receiver of frequencies in this region. NSA-7 broadcasts pure, natural frequencies, containing beneficial modulations for the brain such as Schuman and Earth magnetic field, sun white/pink noise. This generates in the brain a natural thriving environment as it was possible thousands of years ago. NSA-7 generates fully compatible waves, like those produced by the brain, therefore there are no risks or side effects. The device must be carried close to the body. NSA-7 influences only the person carrying the device, no interactions with the neighboring persons.

You can use the device permanently without habituation effects, reducing its beneficial interactions with the brain. This device does not interfere with any other electronic and electric appliances.

**Device Safety:**

Before using this device read first this booklet. Do not use the device in rooms with high humidity, or high room temperature, as well as it can be exposed to strong sun radiation.

Do not try to open or repair yourself the device, the warranty is then voided. Please contact us for any warranty cases. Do not drop the device on hard floors, tiles, asphalt.

**Settings and Applications:**

On the right side there is a Switch On/Off. The device is delivered fully charged and can be immediately used. The Lithium battery can be recharged and used for 164 years (60000 recharging cycle). Once the device charging was completed, you can use for 60-90 days NSA- 7 without additional charging.

On the top of device there are two buttons; left for control function and next to it one settings button; to change the waves characteristics you must first push and keep pushed the control button while you are scrolling the setting button until you reached the desired wave range. When starting, the device goes automatically in "Slow Alpha" mode.

The best position of NSA-7 during the therapy is between heart chakra and solar plexus.

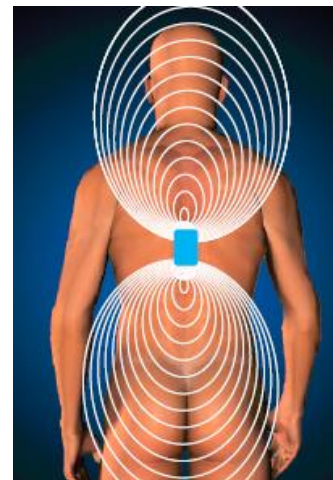

To treat different neurological conditions, you can choose the location of NSA-t on the spine.

To treat wounds, burns, injuries, place NSA-7 close, but not on the wound or injury.

To treat insomnia, place NSA-7 under your pillow.

To treat endocrinological conditions use the NSA-7 close to the thyroid and/or pineal gland.

To treat allergies, migraines, place NSA-t on the forehead or back of the head (occipital zone) or on vertebra C7.

In the following tables you will find different health conditions which can be improved with the NSA-7.

Indikationen	Recommendet selection							
	SUPER-DELTA	DELTA	GLOBAL	THETA	SLOW-ALPHA	ALPHA	SLOW-BETA	BETA
Astma	●		●					
Anorexia		●					●	
Analytical thinking			●		●			
Blood pressure (general)			●		●			
Blood pressure psychik)	●						●	
Balance diasurbance		●						●
Boosting the immune system	●		●					
Bone fraktures								
Bet wetting	●							●
Boosting adrealine output			●		●	●		
Cardiac dysrhythmia					●	●		
Cramps		●		●				
Cysts	●		●					
Chemotherapy side effekts	●		●					
Concentration weakness			●		●			
Creativity		●		●				
Cell regeneration	●			●				
Driving	●				●
